ANNUAL REPORT OF MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program. An operator conducting mining operations under a Notice of Intention must file an annual operations and progress report (FORM MR-AR) with the Division.

I. General Information

1. Report Time Period: From (mo./yr.) 1/99 To (mo./yr.) 1/2000
 2. DOGM File Number (Mine No): M 1030/016
 3. Mine Name: DOVE CREEK QUARRY
 4. Mineral(s) Mined (or permitted to mine): MICACEOUS QUARTZITE SCHIST
 5. Type of mine ☒ Surface Mine or ☐ Underground Mine
 6. Legal Description (Location of Lands Affected):
1/4, E 1/2, NW 1/4, Section 14, Township 13N., Range 16W
1/4, NE 1/4, SW 1/4, Section 14, Township 13N., Range 16W
1/4, 1/4, 1/4, Section, Township, Range
 7. Name of Operator or Company: UTAH BUILDING STONE SUPPLY
 8. Permanent Street Address: 842 WEST 400 NORTH
City, State, Zip: WEST BOUNTIFUL, UTAH 84087
Phone: 801-295-0601 Fax: 801-295-0601
 9. Company Representative (or designated operator):
Name: WILLIAM BOWN
Title: OWNER
Business Address: 842 WEST 400 NORTH
City, State, Zip: WEST BOUNTIFUL, UTAH 84087
Phone: 801-295-0601 Fax: 801-295-0601
- ☐ Please check if any of the above information has changed since previous year.

II. Mining and Reclamation

1. Was there any mine related activity during the past year? Yes ☒ No ☐
2. If no - what was the last year of activity? _____
3. If yes - how much ore or mineral was mined? 831.18 TONS - PALLETIZED

4. Briefly describe the type of work performed, volume of material moved, and any new or additional surface disturbances that occurred during the past year.

PLEASE SEE ITEMIZED "ANNUAL MINE REPORT"
ACCOMPANYING RESPONSE

5. How much **additional acreage** was disturbed during the past year? _____

6. How much acreage was **reclaimed** during the past year? _____

7. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.

8. What is the **total** disturbed acreage of entire project at years end? _____

9. Briefly summarize any mining and/or reclamation plans for the upcoming year.

NOTE: Section III., "Additional Information" applies only to **large mining operations**.

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.

IV. Signature Requirement

I hereby certify that the foregoing is true and correct.

Name (Typed or Print):

WILLIAM L BOWN

Title of Operator:

OWNER

Signature of Operator:

William L Bown

Date:

Annual Mine Report

Dove Creek Quarry

Item # 4

During 1999 operations were confined to the area of the former Rocktile Lease, which is located on a certain portion of the deeded mineral area in Clarks Basin. We continued to work the face which the former lessee had begun. It is estimated that 1,000 tons of material was displaced. About 900 tons of this amount was processed, resulting in some 830 tons of palletized material for market. Leaving about 170 tons of fines and waste rock. This material was left in the holes at the base of the quarry face, and some remains about the area of processing. The processing area was that portion of ground previously disturbed by Rocktile and which lies directly west, above the face. There was no new surface disturbance incident to operations.

At the request of the Bear River Health department, and as a consequence of certain intentions incident to the Large Mine Plan of Operations, a test hole for adequate septic system depth was dug about 100 yards directly west of the processing area. A depth of 15 feet was obtained. It is not known whether the agents from BRH have been able to inspect the test hole as of this date. It is anticipated that they will attend to this at the earliest opportunity.

There was no additional reclamation conducted at the site during 99 operations. The operator believes that the Division has a much better idea of the total disturbed acreage amount than the operator does

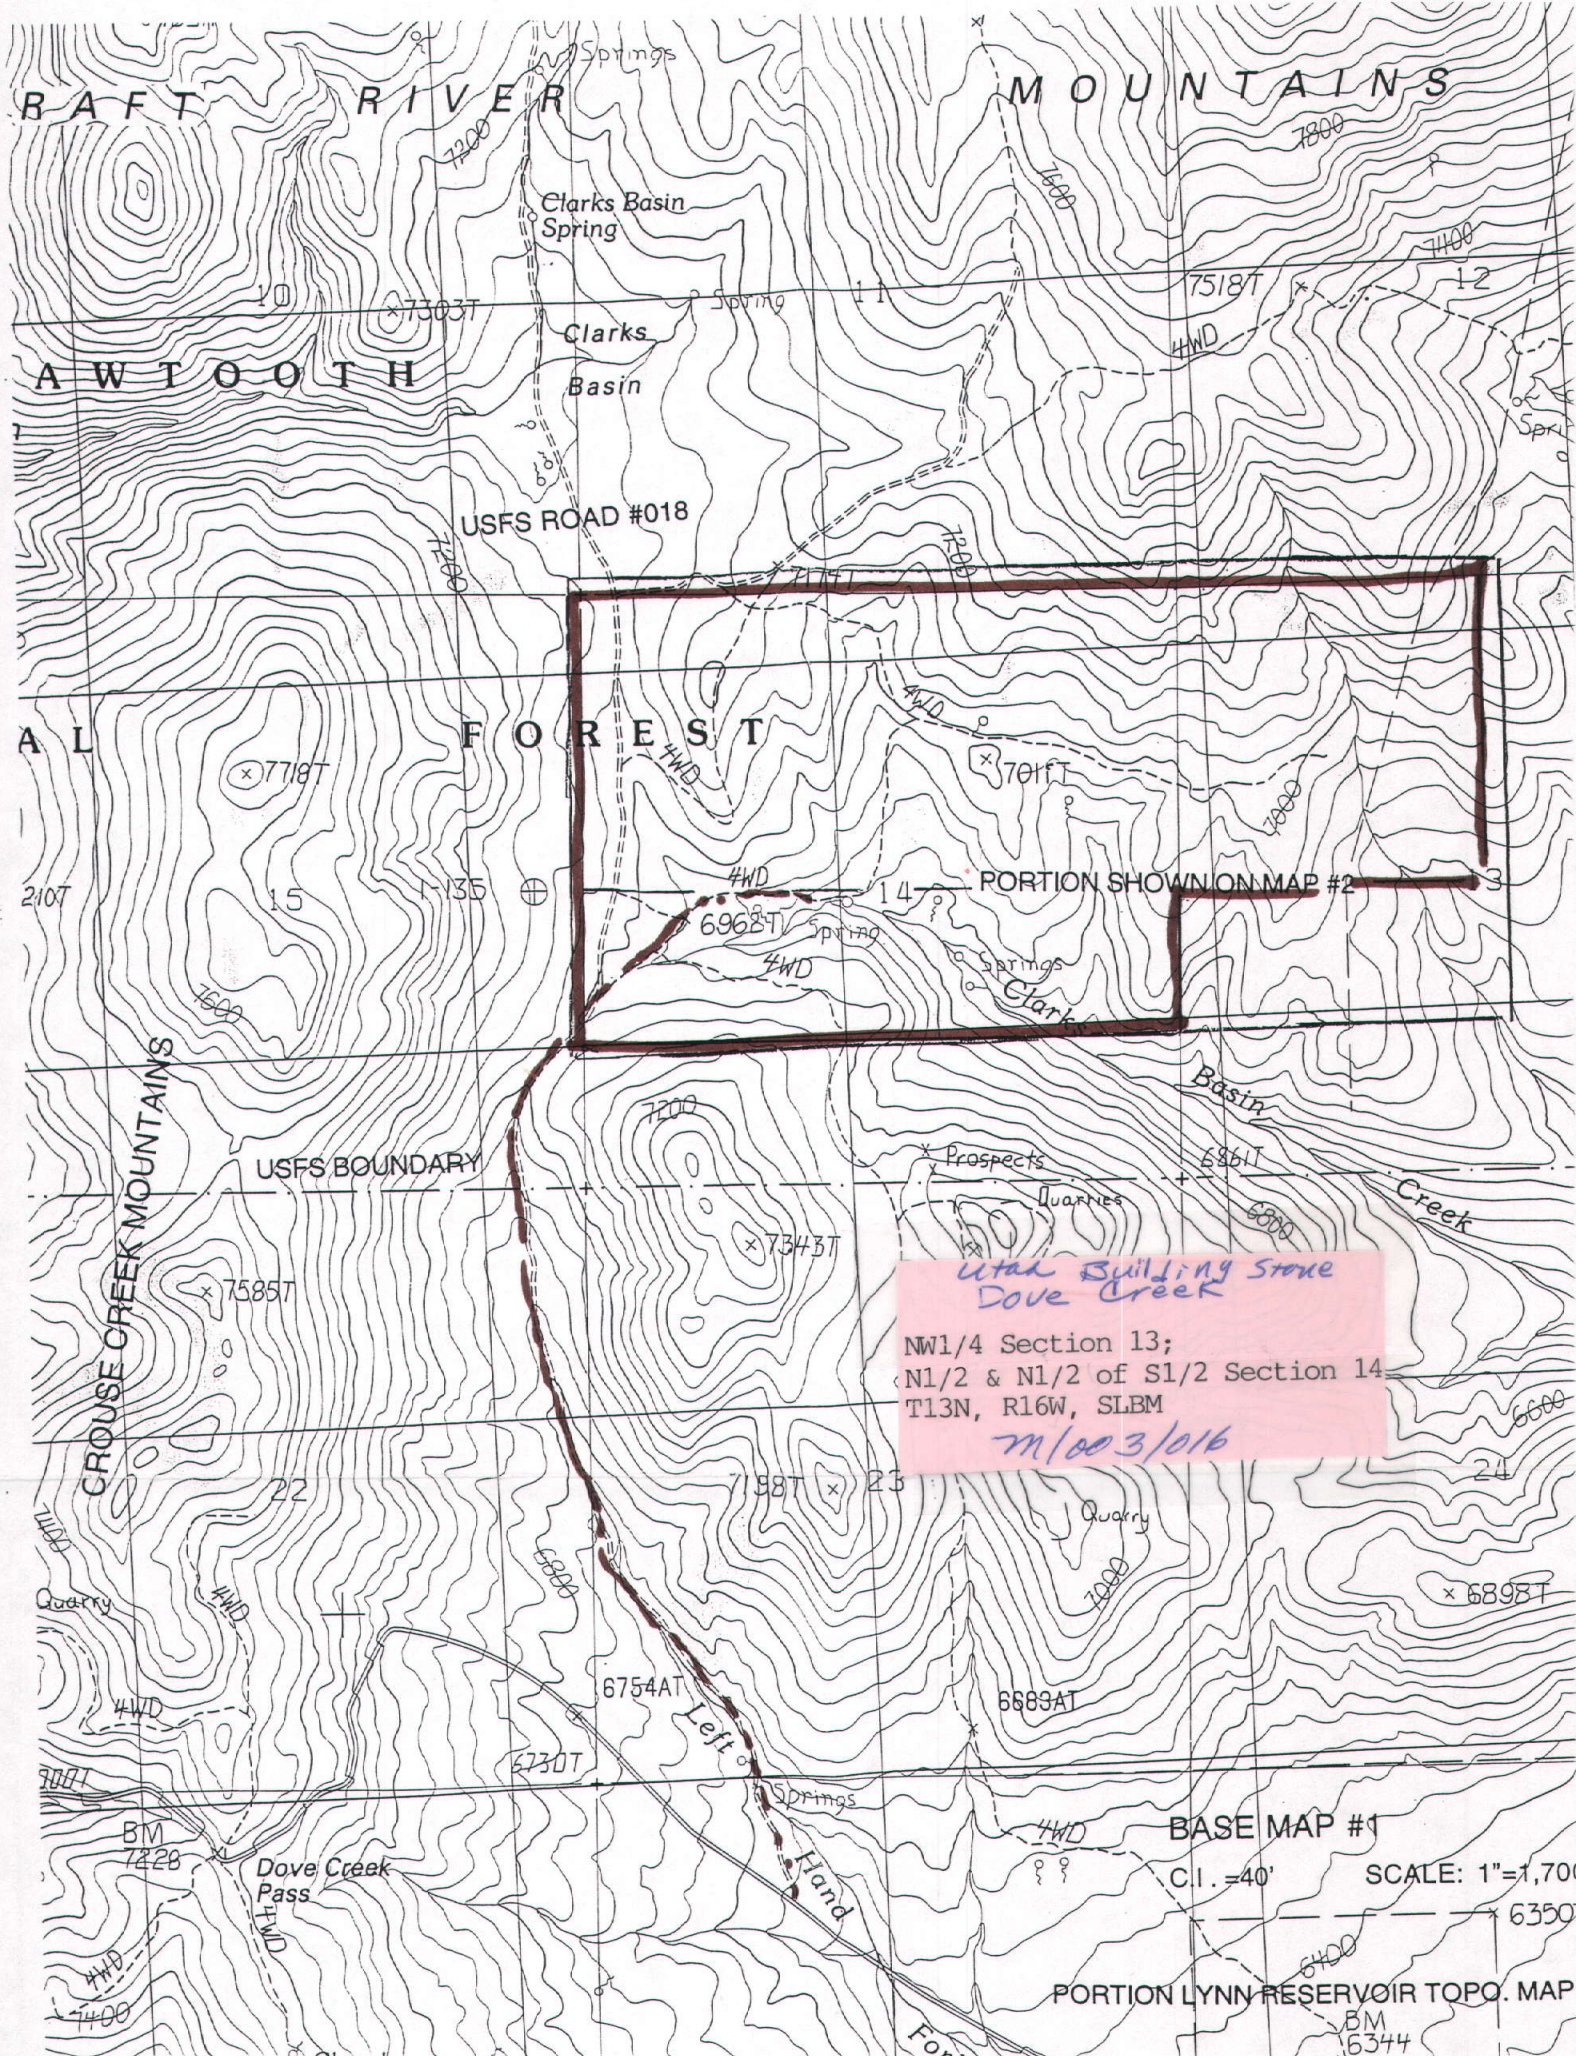

19.7

Item #9

Quarrying plans include the construction of an approved septic system within the private property portion of the Project Area. Following approval, a permanent camp is proposed for this location and initially will be comprised of a number of self-contained trailers in which the crew will live. Ultimately, but likely not this year, a permanent living structure for housing the temporary labor will be proposed and constructed.

Following the receipt of adequate reclamation bond, the main quarry to the north, and on National Forest ground, will be further developed as per the Plan of Operation. Other proposed activities are also planned to take place.

Reclamation processes at the far north quarry will continue. These processes will include the complete filling in of the existing trench or cut to preexisting contour and seed preparation.
